

JCI TO N4 MADE EASY

Send us your JCI backup, and we will send back complete N4 stations. It doesn't get easier than that!

What normally takes a controls engineer days to do, Kander can accomplish in a matter of minutes. This is because we have committed ourselves to developing and refining software tools to handle the bulk of the conversion. If you have a JCI database you need to convert to Niagara4 stations, Kander is the only option that makes sense. Reach out today for a free pricing consultation.

With Kander, the database conversion is quicker, more accurate, and often less expensive than doing the work in-house. It's an easy choice.

EXPERIENCE

After several thousand JCI database conversions, we've seen just about everything, and already have solutions in place.

FOCUS

We eat, sleep, and breathe database conversions. It's all we do, and you won't find anyone who does it better.

CUSTOM TOOLS

We've spent over 10,000 hours developing our tools. Automating the conversion means a faster, more cost-effective solution with less opportunity for human error.
