DEALER PROGRAM OVERVIEW

VYKON Overview

VYKON is Tridium's enterprise and integration brand of Building Automation, Energy, and Security products based on Niagara Framework® technology delivered by premiere Systems Distributors serving VYKON System Integrators (VSI). The VSI will engineer, program, install, and service VYKON building, energy, and security products and software. More than 500 VYKON Systems Integrators are trained and certified to support the complete VYKON product line. VSIs provide complete end-to-end integrated systems utilizing multiple brands of equipment, controls, and peripheral devices. VSIs have direct access to Tridium's VYKON Support Team. To become a VSI you must complete the Niagara4 Certification Training and pay upfront partnership fees.
